Dear Hiring Manager,

I am writing to express my interest in opportunities that align with my background in **data analytics and web development**. With over **four years of professional experience in the fintech industry**, I bring a balanced combination of analytical thinking, technical expertise, and practical problem-solving.

In my current role as a **Data Analyst**, I work extensively with large datasets to perform data cleaning, financial analysis, predictive modeling, and visualization. I regularly develop dashboards and reports using **Python, SQL, Excel, Tableau, and Power BI** to support informed decision-making while maintaining data accuracy and compliance.

Alongside analytics, I have hands-on experience in **web development**, working with **HTML, CSS, JavaScript, PHP, and Python**. I have built end-to-end applications such as a **School Management System** for academic administration and a **Rice Supply Management System** focused on inventory tracking, logistics, and automated stock alerts.

I am currently pursuing my **Master of Computer Applications (MCA)** at Chandigarh University and continuously enhancing my skills to stay aligned with evolving technologies. I am adaptable, detail-oriented, and committed to delivering efficient, scalable, and data-driven solutions.

I would welcome the opportunity to contribute my skills and experience to your organization and add value through both analytical insight and technical execution.

Sincerely,
Akarshan Mishra
